To share an unlisted video, just copy the URL of the video and share it with the people who you would like to have access to it, and they will be able to see it.

Who can access my unlisted video?

Only the people who you share your unlisted video's URL have access to the video. That said, if one of your contacts then shares the unlisted video URL on a blog or public website or with people they know, the video will be available and accessible to those people (and the people who they choose to share with) as well. It's therefore important to communicate to your contacts that you wish to maintain limited access to your unlisted video and that you only share the video with people you trust.
